

Hello.

## Study Question:

Are there options that might provide more efficient ways or patterns to organize how the K-5 program is implemented/delivered over the next three years?

## Role:

- “Guest Outsider”
- “Hold up a mirror to the data”
- Data transparency
- Organize the data into a useable tool
- Identify scenarios to answer the study question.

- List possible *opportunities* and *challenges* to each scenario.
- Report the data and scenarios without bias or advocacy.

# Baseline Data

- Enrollment projections
- Pupil capacity of the schools
- Local class size goals
- Local culture in deploying staff
- Current K-5 program elements
- Visit to each school hosted by the principal
- Interview session with the leadership team

# Findings of the Study

- Presented to the K-5 faculty and support staff
- Presented at a public meeting
- Organize two public meetings to help all learn and record perceptions of the community regarding the opportunities and challenges of the various scenarios that answer the study question.

Thank you for  
coming.
